Russell Jennings AUGER BITS

1943

No. 100—STANDARD POINT

Double thread screw point, our hand brace standard for many years. Especially favored by cabinet makers for its accuracy and boring ease in all woods.

No. 101—QUICK BORING POINT

Coarse, single thread screw point. This bit is very effective in gummy wood, as the thread will not clog.

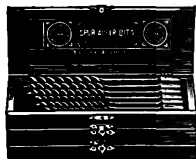

Sizes in 16ths	3	4	5	6	7	8	9
List per doz.	\$12.00	\$10.00	\$10.00	\$10.00	\$10.00	\$10.00	\$12.00

ELECTRICIANS' AND PLUMBERS' BITS

These special bits, with single spur and coarse screw, bore with surprising speed, with or against grain, in gummy or in seasoned wood. Good chip clearance. Long edge life.

L-101E—Length over all, 10½".

Diameters in 16ths: 10, 11, 12.

J-101E—Length over all, 9½".

Diameters in 16ths: 10, 11, 12, 13, 14, 15, 16, 18, 20, 22, 24, 28.

J-101S—Length over all, 6½".

Diameters in 16ths: 12, 13, 14, 15.

SOLID HEAD EXPANSIVE BITS

No. 71—Precision cutter operates entirely within a one-piece steel head. Not held on the face by plates or clamps and can not work loose, even at extreme adjustment. Accurate screw adjustment, not a sliding scale. List price with two cutters affording total diameter range of ¾" to 2½", \$54.00 per doz.

EXTENSION LIP LONG DOWEL BITS

No. 102

Carried in stock sizes 3/16 to 12/16 by 32nds. List prices same as Nos. 100 and 101, above.
